# Chapter 2

## Cross-Platform Testing

### 2.1 Test Objective

The goal of this test is to evaluate the consistency and usability of the GUI for the following webpage across multiple browsers and platforms:

URL: [Link](#)

We aim to identify any layout issues, rendering differences, or broken elements when accessed from different environments.

### 2.2 Tools Used

BrowserStack Live: [Link](#)

BrowserStack enables real-time testing across various devices, operating systems, and browsers without the need for physical devices.

### 2.3 Test Steps

- Step 1: Access BrowserStack Live and log in to the platform
- Step 2: Choose Browsers & Platforms:
- Step 3: Open the target URL in each environment:

| Platform  | Browser        | Version |
|-----------|----------------|---------|
| Window 11 | Google Chrome  | 138     |
| Window 11 | Microsoft Edge | 138     |
| Window 11 | Firefox        | 140     |

- **Step 4: Observe and evaluate the following UI elements:**
  - Page layout and alignment
  - Navigation bar and category filter
  - Product cards (image, name, price)
  - Font and color consistency
  - Responsiveness of page

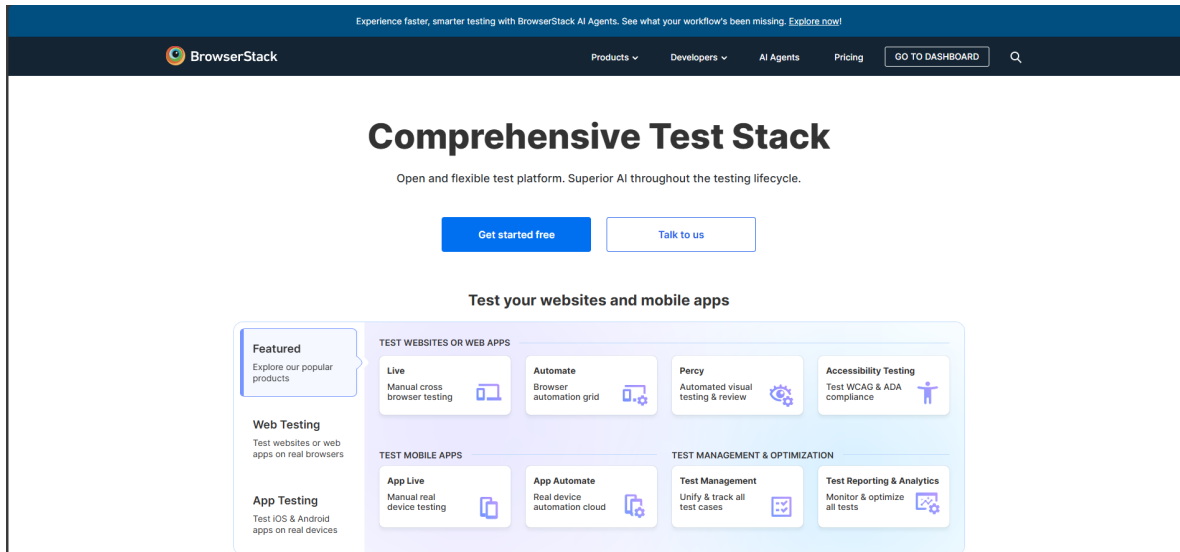

Figure 2.1: Step 1

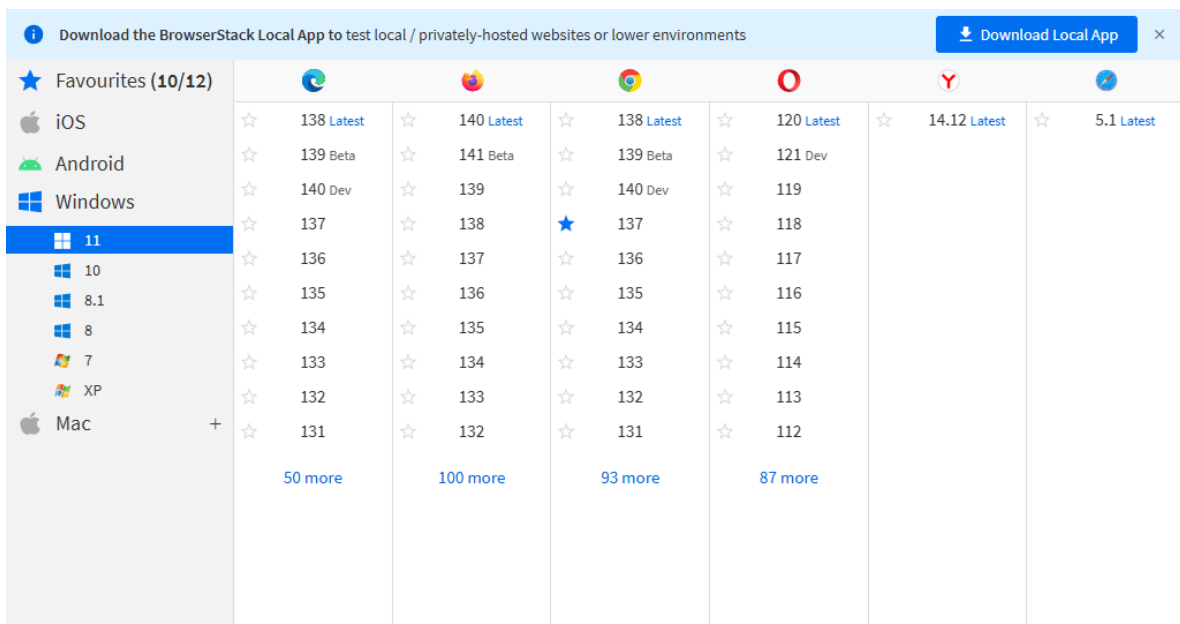

Figure 2.2: Step 2

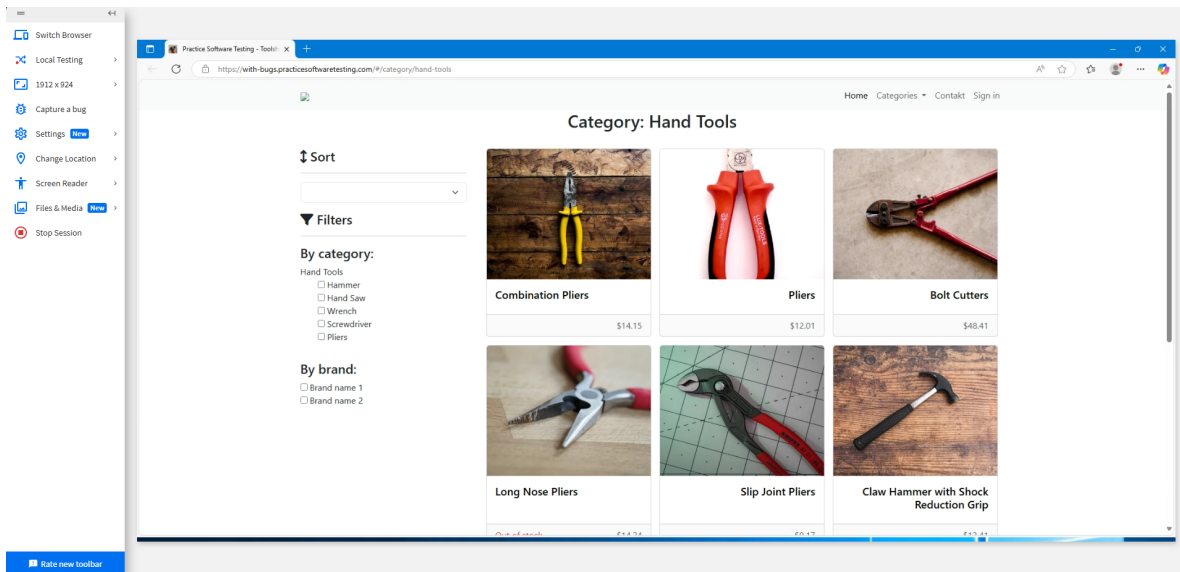

Figure 2.3: Step 3

## 2.4 Observations

### 2.4.1 Google Chrome on Window 11

- **Layout & Alignment:** Clean layout, but the “Category: Hand Tools” title is aligned too far left.
- **Navigation & Filters:** Navigation bar is clear, but “Contakt” is a typo; filters are well-organized.
- **Product Cards:** Products display correctly; some images appear slightly blurry.
- **Font & Colors:** Font and colors are consistent and easy to read.
- **Responsiveness:** Page is responsive on desktop with no horizontal scroll.

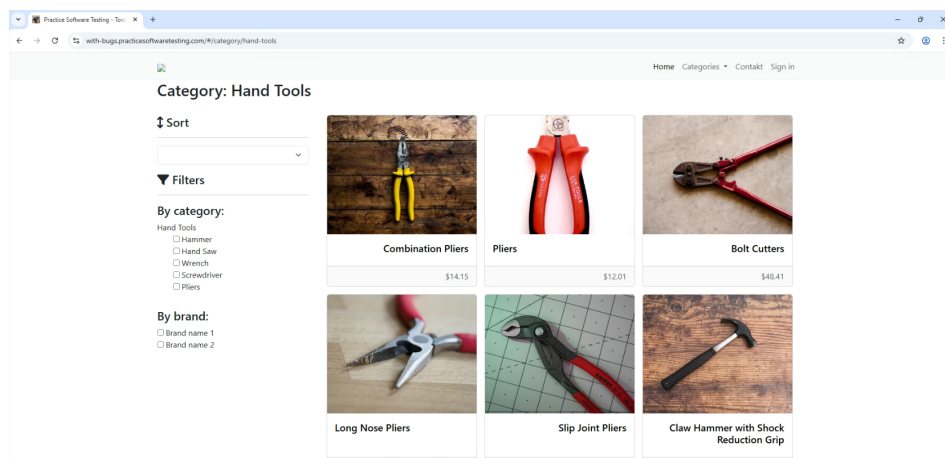

Figure 2.4: Google Chrome

## 2.4.2 Microsoft Edge on Window 11

- **Layout & Alignment:** Layout is clean; the title “Category: Hand Tools” is in the center.
- **Navigation & Filters:** Navigation works, but there’s still a typo in “Contakt”; filters are clear and aligned.
- **Product Cards:** Product cards render properly; one item shows “Out of stock”, which is styled well.
- **Font & Colors:** Fonts are readable and consistent; color scheme is minimal and effective.
- **Responsiveness:** Page fits screen without overflow; all elements adapt well to window size.

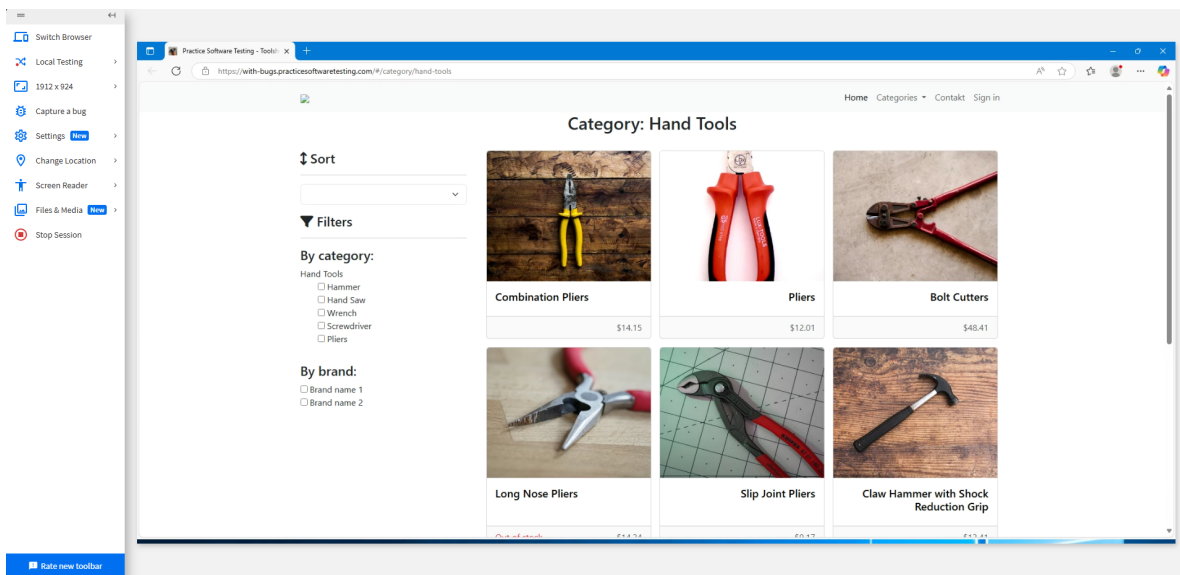

Figure 2.5: Microsoft Edge

## 2.4.3 Firefox on Window 11

- **Layout & Alignment:** Layout is structured well, but the page title is still slightly left-aligned.
- **Navigation & Filters:** Navigation bar works fine; the word “Contakt” remains misspelled.
- **Product Cards:** Product cards display correctly, but some product names overflow outside the card boundary.
- **Font & Colors:** Fonts and colors are consistent and legible across all elements.
- **Responsiveness:** The page adapts well to the browser size with no scroll issues.

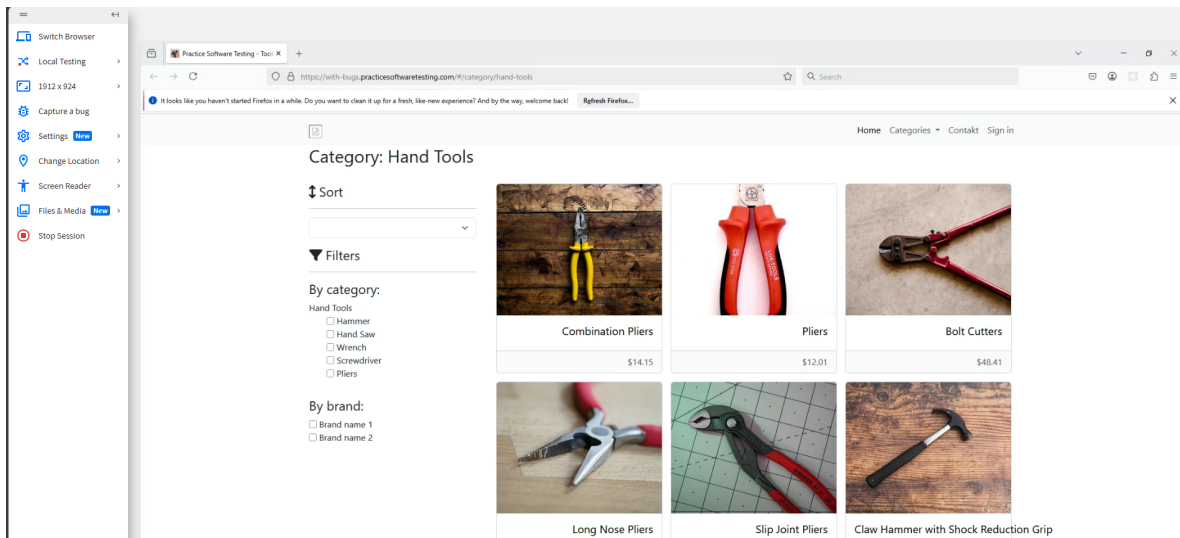

Figure 2.6: Firefox

## 2.5 Conclusion

The GUI of the “Hand Tools” category page functions well across all tested platforms. Minor issues such as spacing inconsistencies, text overflow, a broken logo image, and button scaling were found but do not affect core usability. These could be improved to enhance visual consistency across devices.

### Recommendations:

- Apply CSS media queries to better scale buttons on mobile.
- Optimize image loading performance on Firefox.
- Adjust filter dropdown padding for consistent spacing.
- Fix the broken/missing logo image at the top-left.
- Correct the typo “Contakt” in the navigation bar to “Contact”.
- Center-align the “Category: Hand Tools” page title properly.
- Prevent long product names from overflowing outside their cards

# Chapter 3

## Self-Evaluation

| Criteria     | Max Point | Self-assessment |
|--------------|-----------|-----------------|
| BrowserStack | 30        | 30              |
